

August 13, 2021

Mr. Dave Thompson
SCL – LEA Program Manager
5050 Commerce Drive
Baldwin Park, CA 91706

**Subject: July 2021 Monthly Report (MRMP 46, 96, 119 & 125)
Sunshine Canyon Landfill, SWFP No. 19-AA-2000**

Dear Mr. Dave Thompson

Pursuant to the self-monitoring report program requirements detailed on pages 3-4 of the Sunshine Canyon Landfill (SCL) Solid Waste Facilities Permit (SWFP), the following information is provided to the LEA for the month of July 2021.

Condition 16.a. – Types & Quantities of Non-Hazardous Waste Received

The attached copy of the monthly activity report includes a daily and weekly breakdown of waste tonnages received on site.

Condition 16.b., MRMP 91, Q-B.5.b – Number and Types of Vehicles Using the Facility

The attached copy of the monthly activity report includes the type and number of vehicles that use the facility on a daily and weekly basis.

Condition 16.c. – Results of the Hazardous Waste Load Checking Program

The types and quantities of hazardous waste and other prohibited wastes found in the waste stream are outlined below. All prohibited wastes are removed from the disposal area, quarantined in a designated location and disposed in accordance with applicable requirements. The following is a list of prohibited wastes found during the month:

Prohibited Waste	Quantity	Units	Disposition
Paint Related	7	Gallons	Hazardous waste TSDF
Oil Related	0	Quarts	Hazardous waste TSDF
Batteries	1	Each	Hazardous waste TSDF or E-waste Recycler
Electronics	276	Each	E-waste Recycler
Construction and other Chemical Compounds	0	Gallons	Hazardous waste TSDF

Containers with Residuals	0	Each	Hazardous waste TSDF
Aerosols	0	Each	Hazardous waste TSDF

Condition 16.d., Q-B.5.c – Reports of all Special or Unusual Occurrences

The attached copy of the Monthly Log of Special Occurrences includes a detailed description of the incident and response actions taken.

Condition 16.e., Q-C.2, IMP X.B.7 & IMP X.B.6 – Compliance Summary

There were no private citizen caller complaints through the Sunshine Canyon 24-hour hotline in July 2021. A copy of the hotline call log for July 2021 is attached.

Condition 16.f. – Record of Receipt of Violation

SCL did not receive any NOV's or AOC's during the month of July.

Condition 16.g., MRMP 34a-d – Results of Landfill Gas Monitoring & Control

The 2021 First quarter 1150.1 Monitoring Report was submitted to SCAQMD on May 13th, 2021.

The perimeter probes are required to be read on a monthly basis, in accordance with Rule 1150.1. The results of the monthly probe monitoring showed readings of 0% (measured as methane) with the following exceptions:

Perimeter Probe	Date Monitored	Readings %CH ₄	Notes
P207-C	7/22/2021	0.1	
P243-A	7/22/2021	0.1	
P205R-C	7/22/2021	1.3	
P205R-D	7/22/2021	2.2	

Condition MRMP 109, CUP 48 – Daily Neighborhood Litter Survey

Daily Litter Survey – July 2021	Quantity of Bags & Other Items
Week One	6
Week Two	35
Week Three	38
Week Four	36
Week Five	27

Condition MRMP 53 – Groundwater Monitoring

The Groundwater and Waste Disposal Monitoring Report for the Second Semi-Annual Monitoring Period of 2020 (RWQCB Facility Global ID No. L10006014618) was submitted in February 15, 2021. This report is available on the Water Board's Database, GeoTracker, at <https://geotracker.waterboards.ca.gov/>, or on Sunshine Canyon Landfill's website at www.sunshinecanyonlandfill.com.

Condition Q-C.10.d.8, CUP 77 – Alternative Fuel

The filling station located at 12881 Encinitas Avenue, Sylmar, California, intermittently provides E-85 fuel. When available the light duty trucks used at Sunshine Canyon Landfill have been fueling with E-85. When the E-85 fuel is not an option, the light duty trucks use unleaded fuel. The Alternative Fuel Logs for July 2021 is attached to this report and is as follows:

Alternative Fuel – March 2021	Quantity of E-85 Fuel Used
7/1/2021 – 7/31/2021	716.914

Should you have any questions regarding the information provided in this report please feel free to contact me directly at (818) 362-2112 or at Dmontano@Republicservices.com

Sincerely,

Dennis Montano
Environmental Specialist

Good evening everyone,

The radiation load we received on July 1st, 2021 at 3:00 p.m. PST from a City of LA Sanitation (West Valley Division) residential side loader truck has been cleared by LA County Department of Public Health, EH Radiation Management Division.

Take care, be safe and have a happy 4th of July weekend,

Thank you much,
Tuong

CITY/COUNTY - REPORT OF SPECIAL OCCURRENCES

	OCCURRENCE #:	44
DATE:	7/12/2021	TIME:
REPORT MADE BY:	Dennis Montano	POSITION: Environmental Specialist

Check One:

- | | |
|---|--|
| <input type="checkbox"/> Fire | <input type="checkbox"/> Accident |
| <input type="checkbox"/> Earthquake | <input type="checkbox"/> Explosion |
| <input type="checkbox"/> Unusual and Sudden Settlement | <input type="checkbox"/> Presence of Hazardous Waste |
| <input type="checkbox"/> Injury | <input type="checkbox"/> Flooding |
| <input checked="" type="checkbox"/> Other Unusual Occurrences | <input type="checkbox"/> Landslide |

Detailed Description of Occurrence:

On Thursday 7/8/2021, during routine site inspections, the Team identified an area in the Bowl/Easement area that looked to be a potential sub surface oxidation event. The area identified was approximately 3 feet in diameter and a depression of approximately 1.5 feet. Within the hour of the initial observation, soil was applied to the area and three wells nearby wells were shutoff (Well IDs: CGW3615 and CGW2043D, CGW2043S).

Actions taken to mitigate this occurrence:

After the initial response, we evaluated the gas infrastructure for any damage, and confirmed the event did not damage the system. Probes have since been installed around the area. Attached are the probe results from the date of the event through current. The team is in agreement that the SSO event will be snuffed as CO levels are trending downwards. We will continue to monitor the area to verify that the SSO is completely snuffed. In the meantime, please let me know if you have any questions.

Detailed Description of Occurrence:

This morning (7/20) at approximately 7:00 AM, during routine site inspections, the site Team identified an area at the southern end of the CC4 Part 3 slope/above the exit haul road that looked to be a potential sub surface oxidation event (SSO).

Actions taken to mitigate this occurrence:

The area identified was a depression in the soil approximately 5-feet in diameter. After discovering this area, the Team followed response protocol to shutoff nearby wells (IDs CGW3705, CGW3706, and CHC022B), added additional cover to the area, and moisture condition and track walked the area. After the initial response, we evaluated the gas infrastructure for any damage, and found none. Probes have since been installed around the area of the SSO. Attached are the probe results from today. A bag sample has been collected and has been sent to the lab. The team is actively investigating the cause and will continue to gather data until the SSO event is completely snuffed, and update the group accordingly.

Detailed Description of Occurrence:

Innovative (Vizcarra) Transfer Truck #ODY111 (License plate #9D30849) set off the radiation detector on July 22, 2021 at 1:15 PM. The load was isolated and the LEA and L.A. County Department of Public Health, Radiation Management was notified. L.A County Department of Public Health authorized the load for disposal on July 22, 2021.

Actions taken to mitigate this occurrence:

The LEA was notified by email.

To whom it may concern:

This letter determines the disposition of the waste shipment which activated the radiation alarm.

Driver: Cesar Ramirez or other Vizcarra / Innovative driver _____

I.D. Number of truck: Cab # 26 / California 4TL2688 / Trailer # 0DY111 / California 9D30849__

Date and time the truck arrived at waste disposal: July 22, 2021 @ 1:15 p.m.

☒ The waste load identified above is authorized to be buried as normal waste. The authorization is for this waste load only. Dispose of the waste directly into a landfill.
Do NOT mix or transfer waste prior to disposal.

☐ The waste load identified above was surveyed and the radioactive material was identified, and taken into custody by LA County Public Health.

☐ The remaining contents of the waste load identified above was resurveyed and found to contain no radiation above background levels and is authorized to be disposed as normal waste.

Good evening everyone,

The radiation load we received on July 22nd, 2021 at 1:15 p.m. PST from an Innovative (Vizcarra ODYIII) transfer trailer truck has been cleared by LA County Department of Public Health, EH Radiation Management Division.

Take care and be safe,
Tuong

CITY/COUNTY - REPORT OF SPECIAL OCCURRENCES

	OCCURRENCE #:	50	
DATE:	7/30/2021	TIME:	9:30 AM
REPORT MADE BY:	Dennis Montano	POSITION:	Environmental Specialist

Check One:

☐ Fire

☐ Accident

☐ Earthquake

☐ Explosion

☐ Unusual and Sudden Settlement

☐ Presence of Hazardous Waste

☐ Injury

☐ Flooding

☒ Other Unusual Occurrences

☐ Landslide

Detailed Description of Occurrence:

Today at approximately 9:30 a.m. Los Angeles Department of Water and Power (LADWP) representative came to inquiry about a higher than normal water usage. It was determine there is a water leak at the Front Entrance near the back-flow preventer on the 12" water mainline.

Actions taken to mitigate this occurrence:

At this time it is difficult to determine a quantity of water loss, however the area has been evaluated, contained, and a repair in progress..

Time In		Time Out		Inspection Time	
Facility Name				Received By	
Sunshine Canyon City/County Landfill				Browning-Ferris Ind. Of Calif., Inc.	
Facility Location				Owner Name	
14747 San Fernando Road, Sylmar, Sunshine LF (in Los Angeles County) 91342				Republic Services INC.	
Inspector				Also Present (Name)	
Patricia Hundt					

THE ABOVE FACILITY WAS INSPECTED FOR COMPLIANCE WITH APPLICABLE SECTIONS OF DIVISION 30 OF PUBLIC RESOURCES CODE (PRC) AND TITLE 14 AND TITLE 27 CALIFORNIA CODE OF REGULATIONS (CCR)

☒ **No Violations or Areas of Concern**

Inspection Report Comments:

This report is a compilation of the SCL-LEA staff observations for the period of 06/25/2021 to 07/2/2021.

On Tuesday, June 29, 2021 perimeter probe monitory was conducted on the county side of the landfill by SCS. One readings was above 1%.
205R-D 1.5%.

Weather conditions were sunny and warm during this observation period.

Two working faces were in use in the CC4-Part 3 & CC4-Part 4A areas. The dirt covers and the alternative daily covers were effective in covering up all waste at the end of the day's operation.

The spotters were directing traffic.

Litter fences were in place around the working faces to assist in controlling the litter.

The portable water-atomizing cannons were in use. Misters were also in use on the perimeter fences and along the haul road for odor control.

The water trucks and sweepers were in use for dust control. The bird control measures were in place to control the birds.

The load checks were conducted during this observation period.

☒ **No Violations or Areas of Concern**

Inspection Report Comments:

This report is a compilation of the SCL-LEA staff observations for the period of 07/03/2021 to 07/09/2021.

On Wednesday, July 7, 2021, a subsurface oxidation (SSO) event occurred on the county portion of the landfill. Smoke was observed near gas wells CGW3615 and CGW2043D, CGW2043S. The surrounding wells have been taken off-line. Dirt was placed over the affected area and compacted to minimize the potential for oxygen intrusion. Five push probes have been installed to monitor the temperatures and the carbon monoxide (CO) levels of the impacted area.

The operator was performing a daily Draeger tube sampling of the CO levels and a weekly collection of the CO bag samples. The CO bag samples, at a minimum, should be collected weekly, analyzed by a certified laboratory and have the laboratory results submitted to the SCL-LEA until further directed by the SCL-LEA to discontinue sampling. Republic Services was also directed to report the daily temperature readings of the push probes and the concentrations of the CO level, measured via the Draeger tube sampling, to the SCL-LEA.

Weather conditions were sunny, hot and dry during this observation period.

Two working faces were in use in the CC4-Part 3 & CC4-Part 4A areas. The dirt covers and the alternative daily covers were effective in covering up all waste at the end of the day's operation.

The spotters were directing traffic.

Litter fences were in place around the working faces to assist in controlling the litter.

The portable water-atomizing cannons were in use. Mistlers were also in use on the perimeter fences and along the haul road for odor control.

The water trucks and sweepers were in use for dust control.

The bird control measures were in place to control the birds.

The load checks were conducted during this observation period.

The excavation and construction of a new haul road, near the front of the landfill, continued during this observation period. The construction did not interfere with normal traffic flow in and out of the landfill, or caused on-site safety hazards. A spotter was present and road signs were posted and visible to the drivers on the current haul road, as of this observation period.

Inspection Report Comments:

This report is a compilation of the SCL-LEA staff observations for the period of 07/17/2021 to 07/23/2021.

On Tuesday, July 20, 2021, a subsurface oxidation (SSO) event occurred on the slope between the two current active working cells, CC4-Part 4A and CC4-Part 3. Smoke was observed near gas wells CGW 3705 and CGW 3706. Surrounding wells have been taken off-line. Dirt was placed over the affected area and compacted to minimize the potential for oxygen intrusion. Five push probes have been installed to monitor the temperatures and the carbon monoxide (CO) levels of the impacted area.

The operator was performing a daily Draeger tube sampling of the CO levels and a weekly collection of the CO bag samples. The CO bag samples, at a minimum, shall be collected weekly, analyzed by a certified laboratory and have the laboratory results submitted to the SCL-LEA until further directed by the SCL-LEA to discontinue sampling. Republic Services was also directed to report the daily temperature readings of the push probes and the concentrations of the CO level, measured via the Draeger tube sampling, to the SCL-LEA.

Weather conditions were hot and dry during this observation period.

Two working faces were in use in the CC4-Part 3 & CC4-Part 4A areas. The dirt covers and the alternative daily covers were effective in covering up all waste at the end of the day's operation.

The spotters were directing traffic.

Litter fences were in place around the working faces to assist in controlling the litter.

The portable water-atomizing cannons were in use. Mistars were also in use on the perimeter fences and along the haul road for odor control.

The water trucks and sweepers were in use for dust control.

The bird control measures were in place to control the birds.

The load checks were conducted during this observation period.

The perimeter gas probes on the city and the county sides were monitored during this inspection period. All perimeter probes were either non-detect for methane gas or below 1%, by volume, except for probes: 205R-C 1.3%, 205R-D 2.2%.

The surveying and the construction of a new haul road, near the front of the landfill, continued during this observation period. The construction did not interfere with normal traffic flow in and out of the landfill, or caused on-site safety hazards. A spotter was present when heavy equipment were operating and road signs were posted and visible to the drivers on the current haul road, as of this observation period.
