Subject: Fourth Quarter 2023 Quarterly Dust/Odor Complaint Report
Sunshine Canyon Landfill, CUP 00-194-(5), Condition 45N

Dear Mr. Nguyen:

Condition 45N of the Sunshine Canyon Landfill CUP 00-194-(5) requires quarterly reporting of the following:

- Fugitive dust and odor complaints received from residents
- Notices of Violation issued by the SCAQMD or the LEA
- Measures undertaken by SCL to address the complaints and to correct the violations.

Attached to this cover letter, please find the above information for the Fourth quarter of 2023.

Should you have any questions regarding the information provided in this report please feel free to contact me directly at (661) 208-9796 or at ozamorano@republicservices.com

Sincerely,

Bryan Zamorano

Bryan Zamorano

Sunshine Canyon Landfill

Mr. David Nguyen
Fourth Quarter 2023
Dust and Odor Report
Sunshine Canyon Landfill
January 15, 2024

October 2023

Compliance Summary (SWFP 16.e, Q-C.2.b, IMP X.B.7 & IMP X.B.6): There were three calls from the private citizen caller complaints through the Sunshine Canyon 24-hour hotline in October 2023.

Record of receipt of any violations from any regulatory agency (SWFP 16.f): SCL received six NOVs from SCAQMD on October 5, 2023, October 6, 2023, October 7, 2023, October 16, 2023, October 17, 2023, and October 19, 2023 for alleged odors on October 5, 2023, October 6, 2023, October 7, 2023, October 16, 2023, October 17, 2023, and October 19, 2023, during the month of October.

November 2023

Compliance Summary (SWFP 16.e, Q-C.2.b, IMP X.B.7 & IMP X.B.6): There were no private complaints through the Sunshine Canyon 24-hour hotline in November 2023.

Record of receipt of a violation from any regulatory agency (SWFP 16.f): SCL received six NOV from SCAQMD on November 3, 2023, November 13, 2023, November 14, 2023, November 15, 2023, November 17, 2023, November 28, 2023 for alleged odors on November 3, 2023, November 13, 2023, November 14, 2023, November 15, 2023, November 17, 2023, November 28, 2023 during the month of November.

December 2023

Compliance Summary (SWFP 16.e, Q-C.2.b, IMP X.B.7 & IMP X.B.6): There were no private complaints through the Sunshine Canyon 24-hour hotline in December 2023.

Record of receipt of a violation from any regulatory agency (SWFP 16.f): SCL received four NOVs from SCAQMD on December 6, 2023, December 19, 2023, December 21, 2023 and December 31, 2023 for alleged odors on December 6, 2023, December 18, 2023, December 21, 2023 and December 31, 2023 during the month of December.

Measures Undertaken to Address Complaints and to Correct Violations

The site team has implemented multiple projects specifically to address odors due to the generation of landfill gas and leachate, which are a natural byproduct of waste decomposition, and solid waste. We are also continuously working to address potential odors at the working face from the material coming into the landfill daily. A review of the odor complaints and details on the specific projects and actions are detailed in the sections below:

Mr. David Nguyen
 Fourth Quarter 2023
 Dust and Odor Report
 Sunshine Canyon Landfill
 January 15, 2024

1. Odor Patterns and Sources

AQMD data from September 2023 will be included in this fourth quarter Dust & Odor report due to data not being available prior to the third quarter report's finalization.

A breakdown of the odor patterns which includes date(s) and time(s) of verified odor complaints, the nature, source, and cause of the odor are provided in Attachment B. Attachment B also provides the trend and NOV history of odor complaints for SCL from 2010 through August 2023. The analysis of the odor patterns provided by South Coast Air Quality Management District provides insight to the percentages of the complaints that were verified as trash, landfill gas, 'NFR' meaning there was no field response by the district, and 'none', meaning no odor was detected by the responding inspector. Below is a breakdown of that data.

Sep-23 Total Call Unverified Verified Trash LGF NFR None Other source % Trash % LGF %NFR %None % Other Source NOVS

Table 1. South Coast Air Quality Management District-Sunshine Canyon Monthly Odor Complaints

There was a slight increase in overall calls and NOVs in Q4 compared to Q3 2023. The number of odor complaints during this period (October-December 2023) was higher than the previous quarter (396 compared to 473). The site received 15 odor-related NOVs in Q4, a slight increase from Q3's total of 14 NOVs.

In the month of September, SCAQMD received 148 calls with 15% (22) verified by the SCAQMD inspector as 'Trash' odors, 28% (41) identified as 'Landfill Gas' and the remaining 57% (85) identified as either 'No Field Response' or 'None' ('None'-No odor detected by regulator after a call was recorded in their data system as an SCL sourced odor).

In the month of October, SCAQMD received 230 calls with 18% (42) verified by the SCAQMD inspector as 'Trash' odors, 10% (23) identified as 'Landfill Gas' and the remaining 72% (165) identified as either 'No Field Response', 'Other Source' 'None' ('None'-No odor detected by regulator after a call was recorded in their data system as an SCL-sourced odor).

In the month of November, SCAQMD received 130 calls with 42% (55) verified by the SCAQMD inspector as 'Trash' odors, 1% (1) identified as 'Landfill Gas' and the remaining 57% (74) identified as either 'No Field Response', 'Other Source' 'None' ('None'-No odor detected by regulator after a call was recorded in their data system as an SCL-sourced odor).

In the month of December, SCAQMD received 113 calls with 27% (30) verified by the SCAQMD inspector as 'Trash' odors, 20% (23) identified as 'Landfill Gas' and the remaining 53% (60) identified as either 'No Field Response', 'Other Source' 'None' ('None'-No odor detected by regulator after a call was recorded in their data system as an SCL-sourced odor).

As shown in the data above, the reported causes of those odor complaints that were verified by an SCAQMD inspector varied between landfill gas and trash odors. Experience has taught us that it is often difficult for an observer to distinguish between landfill gas and trash odors, and landfill gas odors are often mistaken for trash odors. There are also many alternate sources of odors in the neighborhood that are unrelated to the landfill (e.g. sewage, stormwater basins, residential trash bins, etc.).

Landfill gas odors can be the result of changes in barometric pressure and adverse wind conditions or construction activities at the landfill that may affect the efficiency of individual GCCS components. Trash odors can be the result of the incoming waste which can, at times be more odorous when combined with unfavorable wind patterns that may carry those odors into the surrounding neighborhood.

The primary contributors of odor in the fourth quarter were the result of odorous waste, due at times to the transfer station network backlog, and unfavorable weather patterns. As shown in the data, the number of gas odor complaints significantly declined when compared to previous quarters in 2023, which is a positive result of the extensive expansion of the GCCS throughout the year.

Additionally, in October through December, a total of 5.76 inches also disturbed the prompt movement of trash out of the transfer station, as traffic impacts led to additional time in the transfer station network. As the site address these challenges, our focus is on implementing proactive waste management strategies to mitigate the impact of extreme weather conditions on our transfer station networks.

2. Effectiveness of Odor Mitigation Measures

The following measures have been implemented to mitigate odors and eliminate potential nuisance to the community:

- The site maintains a dedicated Odor Patrol Team that patrols the site and the neighborhood every day. This Odor Patrol team has proven to be effective at preventing odor nuisance by driving and walking around each neighborhood to detect any potential Sunshine Canyon Landfill-sourced odors. If there are SCL-sourced odors detected, the team stays in direct communication with on-site personnel, and landfilling operations are paused until the odors have dissipated which includes a full stop of all equipment in the working face. The result of pausing operations during unfavorable weather conditions has proven effective at reducing odors at the working face. The neighborhoods that are inspected by the Odor Patrol team are identified on the maps provided. (Attachment C).
- The site team personnel are trained to identify particularly odorous loads, and those loads can be delayed in landfilling, if necessary, by parking them (covered) until wind conditions are favorable.

- The LFG OM&M team provides oversight on a weekly basis and makes improvements and installs, repairs, or replaces pumps.
- Year to date, there have been 36 new pumps installed in wells, including two dual crews pulling and replacing pumps for efficiency.
- The site has installed approximately 8,410ft of linear collectors to reduce odors on site, year to date.
- The site operates 5-7 moveable buffalo monsoon units with neutralizer to support mitigation of odors on an as-needed basis to support mitigation of odors.
- The site operates three fixed perimeter vapor unit systems with a specific design to atomize the chemical neutralizer product. These three systems run continuously (24 hours per day).
- The site operates three portable odor control fan-trailers (referred to as "Odor Domes") throughout operational hours. These units are moved around the working face depending on wind conditions daily.
- The site operates three large-scale misting lines with neutralizer product that run continuously (24 hours per day). These misting lines have been effective at reducing odors experienced in the neighborhood. We also have the ability to switch between the "Wet" and "Dry" system on an as-needed basis to best combat odors depending on wind conditions.

3. Recent Odor Control Measures Implemented

Beginning In November 2021, the SCL team began working with a new odor mitigation contractor. Since then, we have worked with them as they have tailored their neutralizer product to SCL's specific waste stream and odor composition. We continue to stay engaged with them to further tailor the equipment and neutralizer to fit SCL's specific needs and evaluate its effectiveness. Additionally, the third-party contractor continues to make modifications to its neutralizers to improve its efficiency against our specific waste. As part of this partnership, we have placed three state-of-the-art odor control fan-trailer machines (referred to as "Odor Domes") at the working face

and continually move them in accordance with our needs depending on weather conditions for any given day. We have been working to establish their optimal location in relation to the working face and are continuing to evaluate the preferred location.

An Operations and Maintenance team maintain the landfill gas collection and control system daily. The system is constantly being evaluated and improvements are made which can include the installation of replacement vacuum lines, upsizing piping, well tuning, installation or repair of pumps, to name a few. In addition, the site has installed new wells and are in the process of tuning.

4. Corrective Action Plan

For landfill gas-related odors, the landfill's ongoing mitigation program consists of frequent gas well tuning (conducted a minimum of twice monthly), monthly surface emission monitoring, and the expansion, improvement, and maintenance of the gas collection system. The general timeline for additional work on the GCCS is as follows:

- a. In Q4 of 2023, SCL finalized the installation of quarter Q3's designed improvements to the GCCS which included the installation of new vertical grids, new headers, vacuum lines, and installation of new pumps.
- b. The vertical drilling and horizontal collection installation on the GCCS improvements has continued in Q4. The site installed a total of 82 wells in the following areas on site Asphalt, Stockpile, Boneyard, Easement, and Pencil tip.
- c. In Q4, the site further improved its liquids management system. Installed 13 new pumps for a total of 36 new pumps added to the system. In addition, the site replaced two pneumatic pumps with solar power capabilities. These two solar-powered pneumatic pumps are installed as a trial run to determine their efficiency and compatibility with our site.
- d. The site will continue working closely with our O&M contractor to address all gas-related odors through inspections, equipment adjustments, monitoring, etc. See previous section for descriptions of improvements.

For landfill trash-related odors, the landfill's ongoing odor mitigation strategies include the following:

In Late November and Early Dec., the site personnel began the preparation of a new process, which we refer to as a "Laydown Yard". The purpose of the laydown yard is to reduce the potential for odors while tipping activities take place, while still moving the necessarily volume out of the transfer station network throughout the City of LA.

The idea is to continue to minimize the amount of time the waste remains in the transfer station network.

The overall method of the laydown yard process is tipper loads are delivered and dropped in the yard starting at 6 am when the facility opens and stored (covered) until later in the day when weather conditions are typically improved and there is less potential for odors during tipping.

Preparation in Q4 of the Sunshine Canyon Laydown Yard Pilot Program included:

- Delivery of the Empty trailers (14 test units) happened on Dec. 7, 2023, and the program was started on Dec. 8, 2023
- Long term we believe this pilot will be successful and we plan to continue to grow the program and increase the number of trailers being utilized.

The site operations team has also been piloting tipping time windows to coincide with more favorable wind conditions, as much as feasible to reduce impacts in the morning hours.

Other odor reduction programs in the works include working with LA County Public works to allow for the replacement of full soil covers on Saturdays and replace it with ADC. We firmly believe this will reduce Monday morning odors following soil peel-back before waste filling begins. In the long term we know that this will improve the internal drainage functions of the landfill by ensuring proper waste to waste contact. This will also reduce the amount of soil and soil trucks needed for import in order operate the facility.

Mr. David Nguyen
Fourth Quarter 2023
Dust and Odor Report
Sunshine Canyon Landfill
January 15, 2024

Finally, we will continue to active collaborate with all regulatory stakeholders for the development of new, innovative odor reduction techniques and operations that will last throughout the remaining life of the landfill.

Odor control remains a top priority for the site team. The landfill remains committed to its goal of zero odor complaints. The site continues to reject particularly odors loads, or delay delivering materials during challenging conditions.
