Detailed Description of Occurrence:

At approximately 12:30pm on February 19, 2024, SCL experienced a non-authorized discharge into the water conveyance system. A gas well near the super sump inside the closure turf (see photo below) had the collection line pop off resulting in leachate/condensate being released onto the ground and into the stormwater runoff stream adjacent to the well. The O&M team was actually in the area and noticed this right away and shut the well off within 2-3 minutes. It is estimated less than 30 gallons was discharged and there is no visual indication of leachate in the water.

Actions taken to mitigate this occurrence:

The LEA was notified.
