·Estimated based on size and configuration of working face

·Estimated based on maintenance/beneficial use project needs during the month

For the month of September 2024, the material included in the table above was received from: WF Holdings, SUKUT Construction, Tutor-Purple Line 2, Valverde Construction, and California Earth Transportation.

When material arrives at the site, site personnel make real-time decisions to either send the material directly to the working face for application as daily cover/a staging area directly next to the working face for use that week, or directly to a maintenance/beneficial use project elsewhere on the site. Any material that is not utilized immediately within the week for one of these two uses is stockpiled for future use (see attached map indicating location of stockpile).

The 2,500 tpd limit on beneficial reuse material does not apply to clean dirt used as daily cover.

On August 7, 2024 LA County DPW approved the implementation of the ADC Weekend Pilot Project. Therefore, ADC was utilized on September 7, 14, 21, and 28<sup>th</sup> in accordance with the ADC approvals.

Should you have any questions please don't hesitate to reach out to our team.

Sincerely,

*Andrew Asaro*
