RE: Sunshine Canyon City/County Landfill Monthly Activity Reporting – May 2025

Dear Mr. Nguyen,

By letter dated October 22, 2014, the County of Los Angeles, Department of Public Works (DPW) requested the submittal of a monthly activity report providing information on operational activities and occurrences at the landfill. In response to this request, the monthly activity report for the month of May 2025 is attached.

In addition to the attached report, the following information is provided:

- The installation of vertical gas wells and horizontal collectors are done in accordance with the procedures contained in the 'Construction Emissions and Odors Reduction Written Procedures' submitted to the South Coast Air Quality Management District (SCAQMD) on December 9, 2011.
- All flare shutdowns/startups are reported to SCAQMD as required and the corresponding Forms 500-N, Title V – Deviations, Emergencies and Breakdowns are submitted to SCAQMD on a monthly basis.
- During the month of May 2025, all flares operated in compliance with the site's Title V permit conditions;
- The data from the on-site weather stations is located at the SCL office and the southern berm portion of the City South portion of the landfill for May 2025.
- The LEA monthly inspection report for May 2025 was not provided to SCL by May 13, 2025. SCL will include it in June's Monthly Activity Report. SCL has included the most recent LEA monthly inspection report from April 2025. The reports include a detailed description of the site observations made by the LEA.

Facility/Activity Information

Enforcement Agency: Sunshine Canyon Landfill **SWIS Number:** 19-AA-2000

Jurisdiction

Facility: Sunshine Canyon City/County Landfill

14747 San Fernando Road, Sylmar

Sunshine LF (in Los Angeles County), CA 91342

Activity: Solid Waste Landfill

Operational Status: Active Regulatory Status: Permitted

Land Owners(s):

Browning-Ferris Ind. Of Calif., Inc.

The above facility was inspected for compliance with applicable sections of Division 30 of the Public Resources Code (PRC) and Title 14 and Title 27, California Code of Regulations (CCR).

Violations

27 CCR 20690 - Alternative Daily Cover

Pursuant to 27 CCR 20690 (a)(2), the landfill operator is required to place over the entire working face at the end of each operating day either an approved alternative daily cover (ADC) or compacted earthen material to control vectors, fires, odors, blowing litter, and scavenging without presenting a threat to human health and the environment.

Pursuant to 27 CCR 20690 (a)(4)The owner or operator shall place compacted earthen material over the entire working face at the end of any operating day preceding a period of time greater than 24 hours when the facility is closed, unless procedures as required by the EA are in place.

Disposal Facility (Site) Inspection Report (52) Sunshine Canyon City/County Landfill (19-AA-2000) 4/29/2025

Pursuant to Section B.5.2.1 of the approved Joint Technical Document (JTD), the operator is required to use the following procedures when applying the Enviro-Cover as ADC:

- The maximum size of the working face deck area where the Enviro-Cover will be applied will be two to three acres.
- Enviro-Cover will typically be covered the next operating day with additional waste or may be left in place for up to approximately 48 hours over the weekend;
- Enviro-Cover will be positioned a minimum of 5 feet from the outside of the waste material;
- Operations Supervisor will inspect the Enviro-Cover to ensure that there are no tears or punctures. If any tears or holes are observed in the Enviro-Cover, a new sheet of material will be placed.

During this observation period, the LEA observed that the ADC was being used for an extended period of time in exceedance of the approved time limits. Additionally, it was observed that some of the ADC panels had blown open and exposed trash, there had been areas around the wells and edges of the working face that were not covered and the older ADC panels contained rips and holes.

The operator is to immediately correct the problem areas covered by the ADC and to ensure that future application of the Enviro-Cover is consistent with the procedures outlined in the JTD. Operational manager or supervisors are responsible to confirm that all trash is properly covered at the conclusion of each day's operations.

No Areas of Concern

Inspection Report Comments

This report is a compilation of the SCL-LEA staff observations for the month of 2025 April.

A violation for Alternative Daily Cover was noted this observation period.

Leachate seepages were observed weeping from underneath the slope of cell CC3 into cell CC5 and flowing down to the Super Sump basin during this observation period. The operator has been mitigating the problem by having Patriot come and pump out the ponded leachate on a regular frequency, also by spraying the leachate seepage area with microbes for odor control. A referral was made to Regional Water Quality Control Board (RWQCB).

The operator brought in additional crew to pick up the scattered litter and a significant amount of the litter has been removed from areas where it is retrievable. At this time, no litter has been observed in the retrievable areas. There is a small amount of litter remaining in access-challenged areas at South City side.

Disposal Facility (Site) Inspection Report (52) Sunshine Canyon City/County Landfill (19-AA-2000) 4/29/2025

The fire debris have been continued to be taken and properly disposed in a designated area during this observation period.

Weather conditions were mostly cloudy and cool with a few days of drizzling during this observation period. The landfill received approximately 0.74 inches of accumulated rainfall during the month of April.

Two working faces were in use in the CC4-Part 4B/C & CC5 areas.

The spotters were directing traffic during this observation period.

The water trucks and sweepers were in use for dust control.

The portable water-atomizing cannons were in use. Misters were also in use on the perimeter fences and along the haul road for odor control.

The load checks were conducted during this observation period.

There was adequate lighting during the hours of darkness during this observation period.

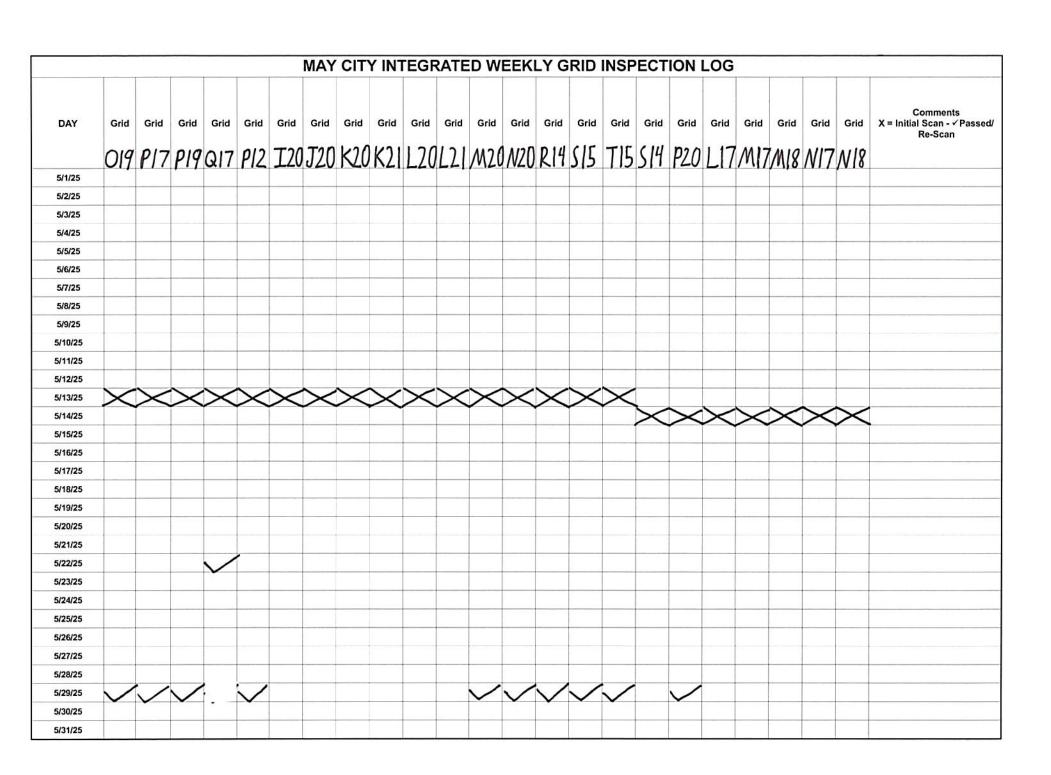

The construction of the liner-anchoring berm near the front of the landfill continued during this observation period. The construction did not cause significant interference with the normal traffic flow in and out of the landfill, or caused on-site safety hazards. Spotters were present when necessary and road signs were posted and visible to the drivers on the current haul road, as of this observation period.
