Mr. David Nguyen
Los Angeles County Public Works
900 South Fremont Street
Alhambra, CA 91803

**Subject: Third Quarter 2025 Quarterly Dust/Odor Complaint Report
Sunshine Canyon Landfill, CUP 00-194-(5), Condition 45N**

Dear Mr. Nguyen:

Condition 45N of the Sunshine Canyon Landfill CUP 00-194-(5) requires quarterly reporting of the following:

- Fugitive dust and odor complaints received from residents.
- Notices of Violation issued by the SCAQMD or LEA.
- Measures undertaken by SCL to address the complaints and to correct the violations.

Attached to this cover letter, please find the above information for the Third Quarter of 2025.

Should you have any questions regarding the information provided in this report please feel free to contact me directly at (661) 208-9796 or at ozamorano@republicservices.com

Sincerely,

Bryan Zamorano

Bryan Zamorano
Environmental Specialist
Sunshine Canyon Landfill

July 2025

Compliance Summary (SWFP 16.e, Q-C.2.b, IMP X.B.7 & IMP X.B.6): There were no calls from the private citizen caller complaints through the Sunshine Canyon 24-hour hotline in July 2025.

Record of receipt of any violations from any regulatory agency (SWFP 16.f): SCL received four NOV's from SCAQMD on July 8, 2025, July 18, 2025, July 24, 2025, and July 30, 2025, for alleged odors on July 8, 2025, July 18, 2025, July 23, 2025, and July 29, 2025, during the month of July 2025.

August 2025

Compliance Summary (SWFP 16.e, Q-C.2.b, X.B.7 & IMP X.B.6): There were no private calls from private citizen caller complaints through the Sunshine Canyon 24-hour hotline in August 2025.

Record of receipt of a violation from any regulatory agency (SWFP 16.f): SCL received four NOV's from SCAQMD on August 20, 2025, August 27, 2025, August 28, 2025, and August 30, 2025, for alleged odors on August 19, 2025, August 27, 2025, August 28, 2025, and August 29, 2025, during the month of August 2025.

September 2025

Compliance Summary (SWFP 16.e, Q-C.2.b, IMP X.B.7 & IMP X.B.6): There were no private calls from private citizen caller complaints through the Sunshine Canyon 24-hour hotline in September 2025.

Record of receipt of a violation from any regulatory agency (SWFP 16.f): SCL received seven NOV's from SCAQMD on September 2, 2025, September 8, 2025, September 12, 2025, September 16, 2025, September 17, 2025, September 18, 2025, and September 20, 2025, For alleged odors on September 2, 2025, September 7, 2025, September 11, 2025, September 16, 2025, September 17, 2025, September 18, 2025, and September 20, 2025, during the month of September 2025

Measures Undertaken to Address Complaints and to Correct Violations

The site team has implemented multiple projects specifically to address odors due to the generation of landfill gas and leachate, which are a natural byproduct of waste decomposition, and solid waste. SCL is also continuously working to address potential odors at the working face from the material coming into the landfill daily. A

review of the odor complaints and details on the specific projects and actions are detailed in the sections below:

1. Odor Patterns and Sources

At the time of finalizing this report, AQMD has yet to publish statistic data for September 2025. September's information will be included in the Fourth Quarter Dust & Odor report.

A breakdown of the odor patterns, which include date(s) and time(s) of verified odor complaints, the nature, source, and cause of the odor are provided in Attachment B. Attachment B also provides the trend and NOV history of odor complaints for SCL from 2010 through June 2025. The analysis of the odor patterns provided by South Coast Air Quality Management District provides insight to the percentages of the complaints that were verified as Trash, Landfill Gas, "Mix" meaning an odor is identified as a mixture of landfill gas and trash odor, "NFR" meaning there was no field response by the district, and "none", meaning no odor was detected by the responding inspector. Below is a breakdown of that data.

Jul-25

Table 1. South Coast Air Quality Management District-Sunshine Canyon Monthly Odor Complaints

In Q3 compared to Q2 of this year, there was a slight decrease in verified complaints. The number of odor complaints during this period (July-August) was lower than the previous quarter, with 284 complaints recorded in Q3 compared to 390 in Q2. The site received 15 odor-related NOVs in Q3, representing an increase from Q2 total of 10 NOVs.

Please note that complaint data for the month of September is not included in the Q3 total due to data being unavailable at the time of this report's completion. However, NOV data is current through the end of September.

In the month of July, SCAQMD received 101 calls with 16% (16) verified by the SCAQMD inspector as "Trash" odors, 20% (20) identified as "Landfill Gas", 0% identified as "Mix", and the remaining 64% (65) identified as either "No Field Response" or "None" ("None"-No odor detected by regulator after a call was recorded in their data system as an SCL sourced odor).

In the month of April, SCAQMD received 183 calls with 20% (36) verified by the SCAQMD inspector as "Trash" odors, 8% (14) identified as "Landfill Gas", 0% identified as "Mix", and the remaining 70% (129) identified as either "No Field Response" or "None" ("None"-No odor detected by regulator after a call was recorded in their data system as an SCL sourced odor).

As shown in the data above, the reported causes of those odor complaints that were verified by an SCAQMD inspector varied between landfill gas and trash odors. Experience has taught us that it is often difficult for an observer to distinguish between landfill gas and trash odors, and landfill gas odors are often mistaken for trash odors. There are also alternate sources of odors in the neighborhood that are unrelated to the landfill (e.g. sewage, stormwater basins, residential trash bins, etc.).

Landfill gas odors can be the result of changes in barometric pressure and adverse wind conditions or construction activities at the landfill, as well as under-performing infrastructure that may affect the efficiency of individual GCCS components. Trash odors can be the result of the incoming waste which can at times be more odorous when combined with unfavorable wind patterns that may carry those odors into the surrounding neighborhood.

The overall improvements that were completed to the gas collection and control system (GCCS) have enhanced collection efficiency in particular areas, thereby reducing landfill gas (LFG) odors. Additionally, the Odor Patrol and Operations teams are taking extra precautions in addressing any detected odors on-site and are responding promptly to changing conditions.

The following measures have been implemented to mitigate odors and eliminate potential nuisance to the community:

- The site maintains a dedicated Odor Patrol Team that patrols the site and the neighborhood every day. This Odor Patrol team has proven to be effective at preventing odor nuisance by driving and walking around each neighborhood to detect any potential Sunshine Canyon Landfill-sourced odors. Throughout the patrol, data is collected and compared to weather patterns. The neighborhoods that are inspected by the Odor Patrol team are identified on the maps provided. (Attachment C).
- The site team personnel are trained to identify particularly odorous loads, and those loads can be delayed in landfilling, if necessary, by parking them (covered) until wind conditions are favorable.
- The LFG OM&M team provides oversight on a weekly basis and makes improvements and installs, repairs, or replaces pumps.
- The site operates two fixed misting lines with neutralizer at the front entrance of the main haul road and above the closure turf. These two systems run continuously (24 hours a day).
- The site operates up to seven moveable buffalo monsoon units with neutralizers to support mitigation of odors on an as-needed basis for point-source odors, such as well-drilling.
- The site operates three fixed perimeter vapor unit systems with a specific design to atomize the chemical neutralizer product. These three systems run continuously (24 hours per day).
- The site operates three semi-portable odor control fan-trailers (referred to as "Odor Domes") throughout operational hours. These units can be repositioned as the site develops, or strategies change but are currently fixed to three strategic locations.
- The site operators implement a Foaming Spray at the working face with neutralizer to support the mitigation of odors.

3. Recent Odor Control Measures Implemented

A dedicated Operations and Maintenance team maintain the landfill gas collection and control system daily. The system is constantly being evaluated, and improvements are made which can include the installation of replacement vacuum lines, upsizing piping, well tuning, installation or repair of pumps, to name a few. In addition, the site has installed new wells and are in the process of tuning.

SCL continues to implement the application of a micro-biological spray a minimum of twice daily to the active working face. This product is designed to mitigate odors by utilizing microorganisms that digest methane thereby helping reduce the overall emissions. The site is actively monitoring and evaluating the effectiveness of this strategy as part of our ongoing odor control efforts.

4. Corrective Action Plan

For landfill gas-related odors, the landfill's ongoing mitigation program consists of frequent gas well tuning (conducted a minimum of twice monthly), monthly surface emission monitoring, and the expansion, improvement, and maintenance of the gas collection system. The site continues to work closely with the O&M contractor to address all gas-related odors through inspections, equipment adjustments, and monitoring. The landfill ongoing work of the GCCS is as follows:

- a. In Q3, the site construction team installed approximately 7,140 linear feet of new slope collectors and horizontal wells.
- b. In Q3, the site began the installation of four "Bottom- up" wells at CC5. These wells will continue to be built upon each lift to install new lateral collection lines.
- c. In Q3, the site has abandoned underperforming or damaged wells, these abandonments reduce potential for odors and are replaced to improve collection at the field. In addition, the SCL site team has installed 67 new vertical wells in Q3. Totaling 101 new wells year to date and plans to install approximately 15 additional vertical wells.
- d. The site will continue working closely with the O&M contractor to address all gas-related odors through inspections, equipment adjustments, monitoring, etc. See previous section for descriptions of improvements.

For landfill trash-related odors, the landfill's ongoing odor mitigation strategies include the following:

the South Coast Air Quality Management District (SCAQMD) approved the proposed Stipulated Abatement Order (SOA) on March 19, 2025. The SOA includes 15 conditions for SCL to eliminate or reduce off-site odors, such as pilot programs for microbiology-based additives, mulch and soil enhancements, Posi-shell, odor neutralizing spray, daily landfill patrols, continued construction of the berm, wet weather plan enhancements, grid identification and emissions control, prioritizing larger diameter casings for gas wells, a smoke test protocol, final closure plan permitting, and partial closure of areas to final grade. These measures are currently underway and partially implemented. SCL continues to work with the SCL-LEA to collaborate on these measures, as outlined in the SAO. An update on the status of these measures and the effectiveness will be prepared as they are implemented in the coming months.

Odor control remains a top priority for the site team. The landfill remains committed to its goal of zero odor complaints. The site continues to reject particularly odors loads, or delay delivering materials during challenging conditions.
