RE: Sunshine Canyon City/County Landfill
Monthly Activity Reporting – December 2025

Dear Mr. Nguyen,

By letter dated October 22, 2014, the County of Los Angeles, Department of Public Works (DPW) requested the submittal of a monthly activity report providing information on operational activities and occurrences at the landfill. In response to this request, the monthly activity report for the month of December 2025 is attached.

In addition to the attached report, the following information is provided:

- The installation of vertical gas wells and horizontal collectors are done in accordance with the procedures contained in the 'Construction Emissions and Odors Reduction Written Procedures' submitted to the South Coast Air Quality Management District (SCAQMD) on December 9, 2011.
- All flare shutdowns/startups are reported to SCAQMD as required and the corresponding Forms 500-N, Title V – Deviations, Emergencies and Breakdowns are submitted to SCAQMD on a monthly basis.
- During the month of December 2025, all flares operated in compliance with the site's Title V permit conditions;
- The data from the on-site weather stations is located at the SCL office and the southern berm portion of the City South portion of the landfill for December 2025.
- The LEA monthly inspection report for December 2025 was not provided to SCL by January 15, 2026. SCL will include it in January's Monthly Activity Report. SCL has included the most recent LEA monthly inspection report from November 2025. The report includes a detailed description of the site observations made by the LEA.

Inspection Information

Inspected By: Sunshine Canyon Landfill **Local Inspection ID:**
Inspection Date: 11/30/2025 **Time In:**
Inspection Type: Periodic **Time Out:**
Inspector: George Kasikarin **Inspection Duration:**
Operator: Browning-Ferris Industries of California, Inc.
Received By:
Also Present (Name):

Facility/Activity Information

Enforcement Agency: Sunshine Canyon Landfill **SWIS Number:** 19-AA-2000
Jurisdiction
Facility: **Sunshine Canyon City/County Landfill**
14747 San Fernando Road, Sylmar
Sunshine LF (in Los Angeles County), CA 91342
Activity: Solid Waste Landfill
Operational Status: Active **Regulatory Status:** Permitted
Land Owners(s):
Browning-Ferris Ind. Of Calif., Inc.

The above facility was inspected for compliance with applicable sections of Division 30 of the Public Resources Code (PRC) and Title 14 and Title 27, California Code of Regulations (CCR).

Violations

27 CCR 20921 - Gas Monitoring and Control

- (a) To provide for the protection of public health and safety and the environment, the operator shall ensure that landfill gas generated at a disposal site is controlled in such a manner as to satisfy the following requirements:
- (1) The concentration of methane gas must not exceed 1.25 percent by volume in air within any portion of any on-site structures.
 - (2) The concentration of methane gas migrating from the disposal site must not exceed 5 percent by volume in air at the disposal site permitted facility boundary or an alternative boundary approved in accordance with Section 20925.

Disposal Facility (Site) Inspection Report (52)
Sunshine Canyon City/County Landfill (19-AA-2000)
11/30/2025

The compliance perimeter gas probes on the city and the county sides were monitored during this inspection period. At the time of the inspection, Probe 245-B had a methane gas concentration reading of 9.7%, by volume. Two independent gas monitors were concurrently used at the time of the inspection and both gas monitors received similar reading results.

The remaining perimeter probes were either non-detect for methane gas, or below 1%, by volume, except for probes: and 205R-C @ 1.5%, 205R-D @ 2.4%, 218-A @ 4.7%, 218-B @ 3.8%, 245-C @ 2.6% and 245-D @ 1.1%. Compliance Wells #205R, #218 and #245 continue to be monitored for changes in methane gas concentration as of the end of this observation period.

On May 23, 2025, the operator submitted a Gas Remediation Workplan to the SCL-LEA for the methane gas exceedance at the perimeter probe 245-B.

The operator has been implementing their proposed corrective actions of:

1. Additional tuning of LFG extraction wells located in the area.
2. Design and installation of new LFG extraction wells in the area of the probe.
3. Tuning and monitoring of new LFG extraction wells for a 60-day period.

Despite implementing the initial Corrective Actions 1 through 3, methane levels at perimeter probe 245-B remained above regulatory thresholds. On July 1, 2025, the operator submitted a Supplemental Work Plan with the SCL-LEA and CalRecycle to install a new soil vapor extraction well in between compliance well #245 and the landfill liner system. The SCL-LEA and CalRecycle have reviewed the Supplemental Work Plan and recommended further tuning of the field wells and possible installation of additional gas collection wells in the vicinity prior to the installation of the new soil vapor extraction well.

27 CCR 20820 - Drainage and Erosion Control

(a) The drainage system shall be designed and maintained to:

- (1) ensure integrity of roads, structures, and gas monitoring and control systems;
- (2) prevent safety hazards; and
- (3) prevent exposure of waste.

The observation period was characterized by cool, mostly cloudy weather with six days of rain. According to the operator's on-site rain gauge, the landfill received a total of 8.01 inches of accumulated rainfall. This significant precipitation overwhelmed the site's drainage system, leading to erosion along the side slopes and the exposure of waste, primarily on slopes CC3B and CC5A below the current working face. Additionally, tracked-in waste was noted within portions of cells CC3A, CC3B, and CC4 Part-3.

Following the heavy rainfall, equipment operators initiated repairs to the daily cover; however, they encountered significant difficulty accessing the affected areas due to saturated soil conditions. While remediation efforts resumed once the ground stabilized enough to support heavy machinery, the exposed waste in these areas had not been fully covered by the end of the month. Notably, no waste appeared to have migrated off-site during this period.

Moving forward, the operator is required to take immediate action to cover all exposed waste and remediate the erosion on the slopes. In accordance with the approved Wet Weather Plan, site management must conduct a comprehensive assessment of all areas to document all storm-related damage. A complete report must be provided to the SCL-LEA detailing the necessary repairs along with a schedule of anticipated completion dates.

27 CCR 20650 - Grading of Fill Surfaces

Covered surfaces of the disposal area shall be graded to promote lateral runoff of precipitation and to prevent ponding. Grades shall be established of sufficient slopes to account for future settlement of the fill surface.

Toward the end of the observation period, several ponds persisted in the County areas. While one pond was intermittently pumped, the operator has been formally requested to clear all standing water.

Surfaces must be regraded to provide sufficient slopes that prevent water accumulation and subsequent infiltration into filled areas.

No Areas of Concern

Inspection Report Comments

This report summarizes the SCL-LEA staff observations for November 2025.

The landfill was closed on Thursday, November 27th, in observance of Thanksgiving.

Active filling occurred mostly in the CC5-A area; however, during and immediately following rain, the working face moved to the prepared wet weather deck in CC4-Part 4 C.

Spotters directed traffic throughout this period.

Water trucks and sweepers provided dust control on dry days, while portable water-atomizing cannons and misting systems (along the perimeter and haul roads) were used for odor control.

Bird deterrents, including a falconer and shot launchers, were also in use.

Load checks were conducted as required.

Regarding site improvements, lining work on the final cell continued and construction of the drainage culvert into the Terminal Basin was completed. This construction did not interfere with normal traffic flow, and spotters were available to manage construction traffic as needed.
